Protocols Launches Express MSA Service

Service makes standard claim process better, faster and easier

Denver - April 30, 2007 - Protocols LLC, a firm specializing in settlement planning for parties involved in workers' compensation and personal injury liability cases, announces the launch of its Express Medicare Set-Aside service ("Express MSA"). With the Express MSA, Protocols brings the company's multidisciplinary consulting expertise to the settlement of standard claims.

"In standard cases, Protocols has expanded their operation and technology to make turnaround times even quicker and the process even easier for all parties," says Protocols President Robert Sagrillo. "Our Express MSA service brings together quality, accuracy and speed. It answers the call of the industry."

The Express MSA is a complete medical cost projection and MSA recommendation that meets current CMS guidelines and practice. Relying on the most recent two years of medical records and payment history, Protocols provides a simple, easy to read MSA report that is ideal for pricing and settling. The service offers file pick-up and turnaround in seven business days from the time the medical records and payment history are received.

The Express MSA is available for all accepted claims for which the most recent two years medical records and payment history are available. The service is available for a low, flat fee of \$1,750.

"The Express MSA is the latest of our innovations for the MSA marketplace," continued Sagrillo. "No other firm in the industry can provide the range of services, expertise and insight that Protocols can."

About Protocols

Protocols LLC specializes in settlement planning for parties involved in legal settlements. Founded in 1996, Protocols got its start as part of the law firm Sagrillo Hammond & Dineen, LLC, a law firm with a national reputation for handling settlement matters. Protocols handles all medical settlement matters, including medical cost projections, Medicare set-aside analysis and allocations, Medicare secondary-payer issues and lien negotiations. The Protocols team of experts – led by industry pioneers Robert Sagrillo and Henry M. Kohnlein – works together with clients to create a plan for the projected medical care of an injured person and works on the most effective way to finance this care. Only Protocols has the medical, public benefits, case management and financial expertise, which provides its clients with the best value in settlement planning.
